SLLS095D - SEPTEMBER 1973 - REVISED OCTOBER 1998

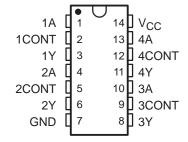

- Input Resistance . . . 3 k $\Omega$  to 7 k $\Omega$
- Input Signal Range . . . ±30 V
- **Operate From Single 5-V Supply**
- **Built-In Input Hysteresis (Double** Thresholds)
- **Response Control that Provides: Input Threshold Shifting Input Noise Filtering**
- Meet or Exceed the Requirements of TIA/EIA-232-F and ITU Recommendation **V.28**
- Fully Interchangeable With Motorola™ MC1489 and MC1489A

### description

These devices are monolithic low-power Schottky quadruple line receivers designed to satisfy the requirements of the standard interface between data-terminal equipment and data-communication equipment as defined by TIA/EIA-232-F. A separate response-control (CONT) terminal is provided for each receiver. A resistor or a resistor and bias-voltage source can be connected between this terminal and ground to shift the input threshold levels. An external capacitor can be connected between this terminal and ground to provide input noise filtering.

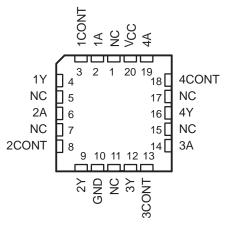

The SN55189 and SN55189A are characterized for operation over the full military temperature range of -55°C to 125°C. The MC1489, MC1489A, SN75189, and SN75189A are characterized for operation from 0°C to 70°C.

**SN55189, SN55189A...JOR W PACKAGE** MC1489, MC1489A, SN75189, SN75189A D, N, OR NS<sup>†</sup> PACKAGE (TOP VIEW)

†The NS package is only available left-end taped and reeled. For SN75189, order SN75189NSR.

| Case temperature for 60 seconds, FK package  |
| Lead temperature 1,6 mm (1/16 inch) from case for 60 seconds: J or W package           |
| Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds: D, N, or NS package      |

<sup>†</sup> Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTES: 1. All voltage values are with respect to the network ground terminal.
